

The homepage showcases the most popular products and features user-friendly sliders for quick navigation between items.

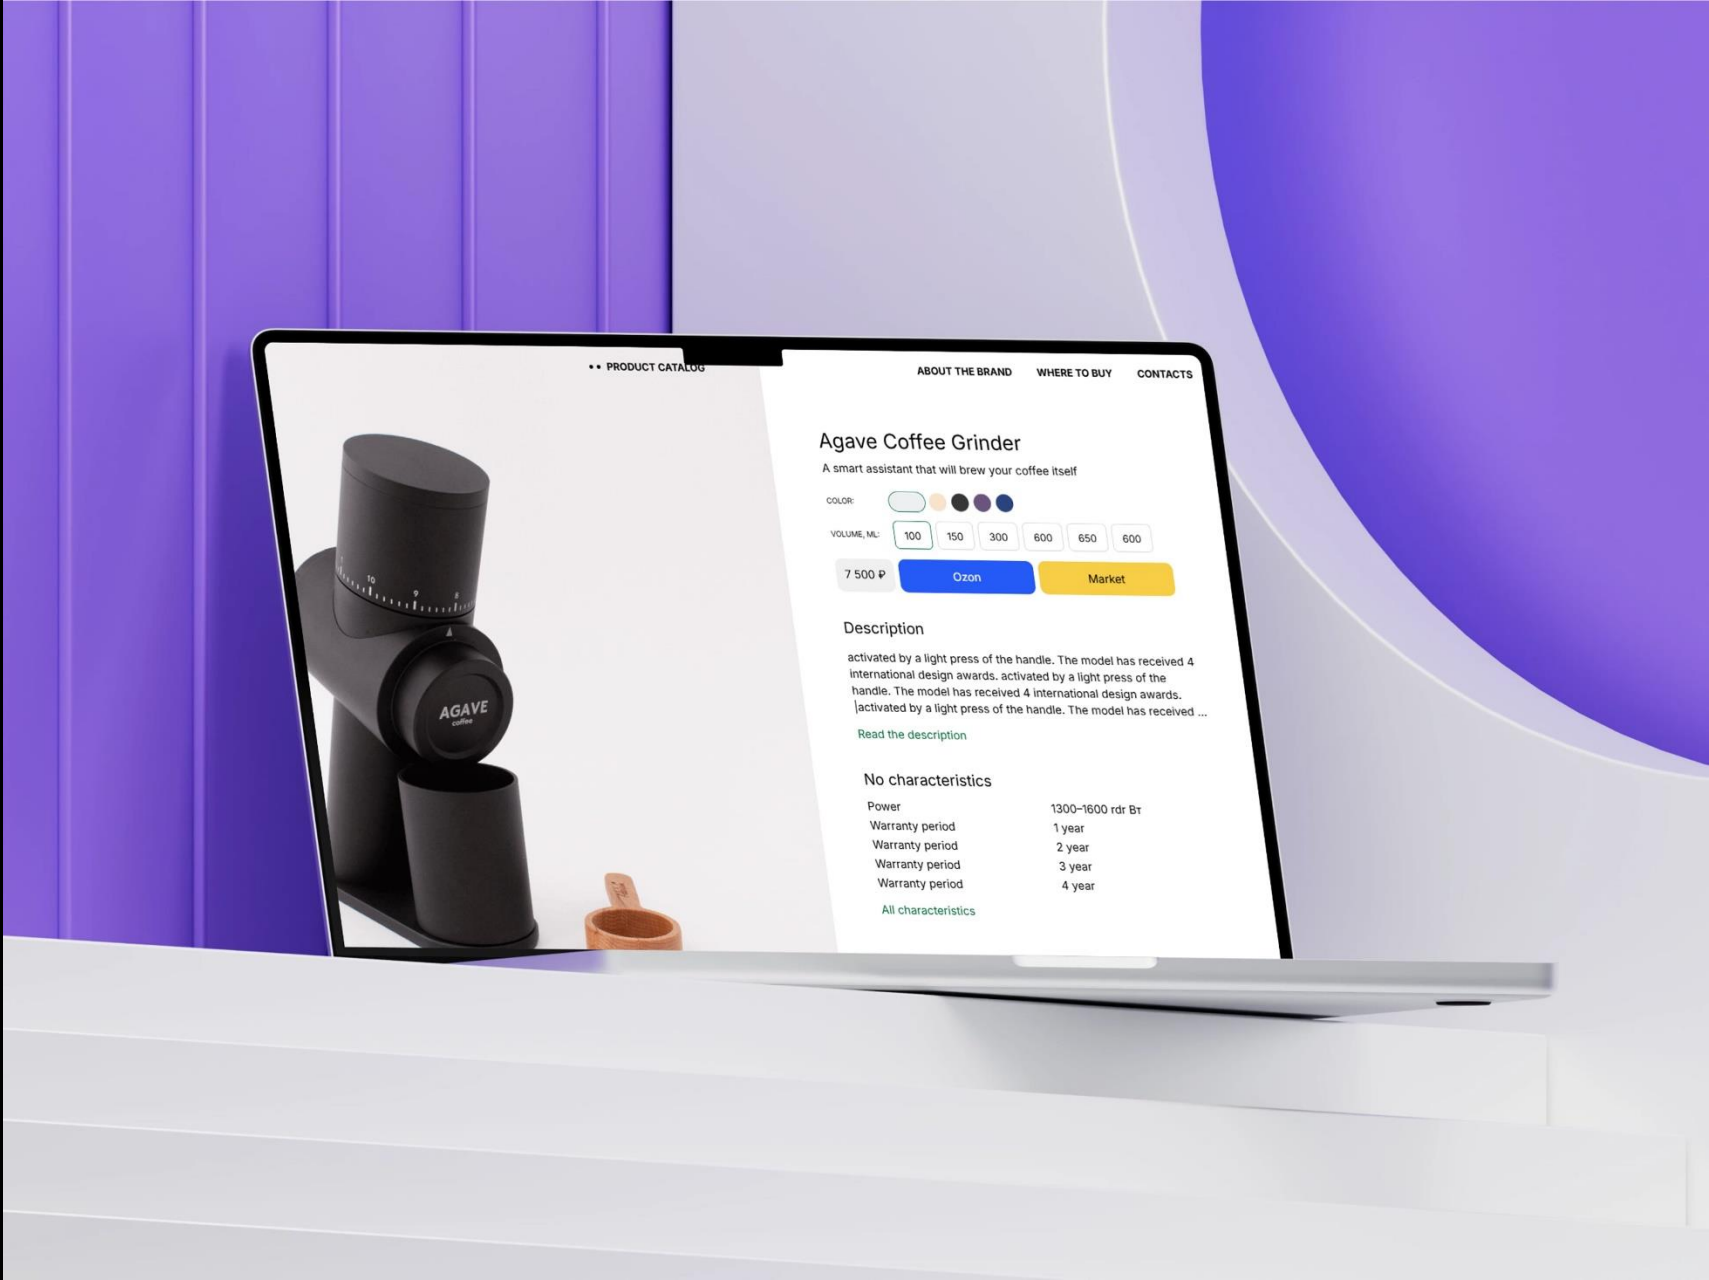

Mobile version creates enough space for smooth finger gestures while keeping all key items accessible and in place.

The catalog page presents a clear product grid enabling quick access to detailed views and ordering.

The product page handles most common product filters, switchers, order functionality in addition to a comprehensive product description.

The full-screen slider serves as a detailed viewer; user can easily explore the product, zoom in and out for a better experience.

The mobile product view is optimized for touch, allowing users to swipe through images, tap to zoom for details, and access key info without scrolling.
